

**TRUCK UTILITY LT GS LANDROVER SERIES 3, ALL TYPES
LEYLAND CHANGE FROM BONDED TO RIVETTED BRAKE LININGS
MISCELLANEOUS INSTRUCTION**

Introduction

1. This instruction details the Leyland change in brake linings and the precautions to be observed when fitting the replacement linings.

Detail

2. The subject vehicle is fitted with bonded brake linings during production, however Leyland have now introduced an improved brake lining which is of the rivetted type.
3. The following precautions are to be observed when fitting replacement linings;
 - a. under no circumstances are bonded and rivetted brake linings to be fitted to the same axle;
 - b. drilled brake shoes may be fitted with rivetted linings after all the bonded lining material has been buffed off; and
 - c. unserviceable bonded brake shoes which are not drilled are to be returned through normal RAAOC channels as repairable.
